

Camp Infrastructure & Sustainability

Camps are facing growing pressure from climate impacts, rising costs, and global instability—placing safe, consistent operations at risk. For children with serious illnesses, these environments are not optional—they are essential.

Ongoing investment is required to maintain and strengthen the infrastructure that makes camp possible. Your support helps ensure camps remain safe, reliable, and able to serve every child.

WHERE YOUR SUPPORT *is Needed*

🕒 FACILITIES & INFRASTRUCTURE

Ongoing investment in facility upgrades, critical equipment replacement, and core infrastructure systems, including HVAC, electrical, water, and roofing, to help maintain safe and reliable camp environments

🕒 SAFETY & SITE ACCESS

Investments in safe, code-compliant facilities and accessible site design are essential to ensure camp environments are physically safe and navigable for all children

🕒 CLIMATE RESILIENCE

Investment in climate resilience helps camps prepare for and respond to flooding, extreme heat, and severe weather, particularly for children with complex medical needs who are more vulnerable to environmental disruptions

🕒 OPERATING STABILITY

Support is essential to help camps navigate rising costs and unstable economic and regional conditions, ensuring they can remain open and delivering consistent, high-quality operations

Support across these areas is essential to maintaining safe and reliable camp operations for every child.
